Dear Council Members,

I was very excited to see new openings on several different City boards and commissions for 2017. As I have continued to become more involved with the City and the community, I feel the Records Commission would be a great opportunity to continue my efforts.

I begin studying at The Ohio State University in January 2017, majoring in Computer Science & Engineering. I believe this allows me to bring a new 21st century view on how the City may better use technology to manage their records. Good recordkeeping can increase productivity among the City Departments and free up more office space.

While this would be my first time on a public board, I have been involved in the community for many years. In 2016, I attended many of the City Council meetings and I have been highly involved in the Youth Soccer program since 2014. I also recently joined the new Park Volunteer Board created by Parks Director Dave Ramsey.

Thank you for this opportunity to further my participation within the community.

Sincerely,

Cory Steer
