

City of Pataskala Utility Department
Nathan W. Coey, Utility Director

Utility Department Updates for the September 6, 2016 City Council Meeting

➤ **Director Updates**

• **Legislation**

- Resolution 2016-053. This will be presented at the September 19th meeting due to my absence from the September 9th meeting. A Resolution authoring and directing the City Administrator to enter into contract with Chaltron Systems Inc for the purchase of new flow metering equipment at Water Treatment Plant #1 in an amount of \$12,600.

- The Water Treatment Plant #1 has an issue with accurately tracking water demand into the distribution system. The current flow meter is in a position that does not provide the appropriate data regarding metered flow.
- The current meter is installed prior to the 200,000 gallon clear well. Water from the clear well is pumped to the distribution system through the High Service Pumps. Our daily production tracking is not accurate for what is pumped to the system.
- The new metering system will track the actual water pumped into the distribution system via the pumps.
- Funds are available for this purchase under the 2016 Utility Budget.

- **River Forest Lift Station Project.** The necessary survey work is underway for obtaining the required lift station property.

➤ **Water Department**

- The backflow prevention devices at the treatment plants have been scheduled for annual testing.

➤ **Water Reclamation Department**

- A biosolids land application event has been scheduled for mid-September to a local privately owned farm field.

➤ **Billing Department Update**

- Outstanding progress on the new home inspection approval process.

Highest Regards, Nathan W. Coey, Utility Director
